CERTIFICATIONS

Google UI/UX Designer Certificate

Highly motivated and dedicated technology professional with a strong background in full-stack development and UI/UX design. Offering 4 years of experience in designing web and mobile applications from the ground up and a proven track record of adding value to software developing projects. Seeking an opportunity to leverage these skills, knowledge, and drive to make a successful transition as a Platinum Digital developer.

WORK HISTORY

October 2022 - January 2023

Junior Developer *Revature LLC*, San Jose, CA

- Collaborated with teams of developers to design and implement web-based applications using JavaScript and relational databases.
- Developed and optimized SQL queries to extract and manipulate data from Oracle databases.
- Provided technical guidance and support to clients throughout the software development lifecycle .
- Designed interactive new features for insurance applications using React Native and CSS.

August 2019 - October 2022

Freelance Web Developer *Fiverr, Upwork Inc., Dribbble*, Fremont, CA

- Designed, implemented, and monitored web pages, plugins and functionality utilizing Javascript, HTML, CSS, Ruby on Rails, PostgreSQL, and React technologies.
- Planned website development, converting necessary data streams into SQL relational databases using MVC structures.
- Implemented scripted tests for Rails backend code using the Rspec framework.

January 2017 - February 2019

Financial Tax Analyst *Crawford, Pimentel & Co*, Milpitas, CA

- Redesigned company's client data management system by converting the database from Excel to a PostgreSQL server, saving 3 minutes on every query.
- Conducted cold communications and outreach to prospective clients, resulting in a 30% increase in new business acquisitions.
- Leveraged CRM software to track customer interactions, update lead statuses, and monitor sales activities.

EDUCATION
